For RF control, NTFUT-DMX-REC-5CH controller 5CH controls the lighting not only in shades of white, but also full-color, so for what can select LED strip.

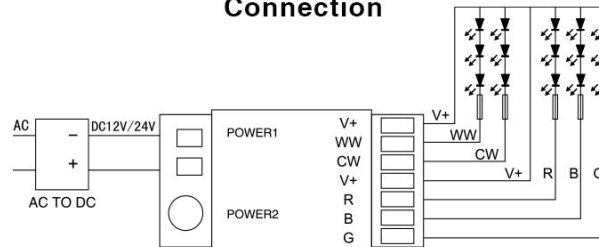

It has a full range dimming from 1 to 100%. Communication with the controller is a 2.4GHz - that provides fast response to commands from the remote control NTFUT-REMOTE-RGB+CCT-ACO for RF for 30 meters.

NTFUT-DMX-REC-5CH

Voltage:	DC12/24V
Output:	Max 6A/ch

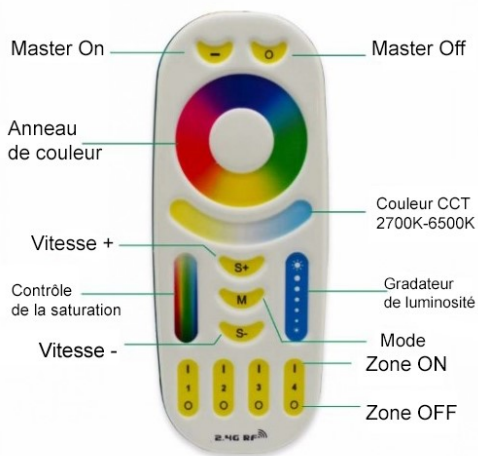

Connection

For the DMX control, the DMX512 LED transmitter can send standard DMX512 protocol data by wireless. It is used to transmit the wireless data between DMX512 control panel and NTFUT-DMX-REC-5CH without no delay for a maximum distance of 30 meters.
