The NTMXXL is the most compact LED driver with a magnetic transformer core. It is equipped with two auto-reset breakers, one on the input and one on the output, which protect both the load and driver. The driver is encased in a coated metal box that includes 2 knock-outs, one on each side to enable easy installation that complies with electrical code requirements.

LED POWER SUPPLY 24VDC DIMMABLE

- Dual protection - primary and secondary auto-reset circuit breakers
- Dimmable with any standard MLV TRIAC dimmer (see at the back)
- Nema 3R enclosure for outdoor use
- Class 2 (except NTM150L)
- ETL listed
- Certified to CSA standard
- Suitable with LED texture product

The transformer must be installed in a well-ventilated area free from explosive gases and vapors. Proper operation requires for free flow of air.

As this transformer is hardwired it should only be installed by a qualified electrician.

Before Installing Check the label and ensure the transformer has the proper input voltage and wattage for the job. Check the wire markings to ensure they match the wiring diagram on this installation guide.
